

LARSEN STRINGS *for Violin* — *'It's all about the music'* —

Larsen II Cannone® Silver for Violin

Our II Cannone Silver set introduces a bold, shining voice to the II Cannone family, designed for violinists seeking a silvery brilliance with an increased overtone resonance and superior projection. This set features five strings including two distinct E-strings to match your sound: a bold and powerful Silver E and a sparkling and focused Caprice E.

At the heart of II Cannone Silver lies a focus on clarity with an overtone-rich resonance, particularly in the upper register. The D and G strings are wound with high-grade 99.85% pure silver flat wire, ensuring exceptional brightness and purity of sound, while enhancing the richness and colours in the lower range. These premium materials not only add a distinctive tonal shine but also contribute to lasting stability and performance durability.

The A string is built upon the same innovative synthetic core as the D and G strings and is wound with precision aluminium flat wire. The Silver E and Caprice E strings both feature a removeable ball end and are made using a unique carbon steel.

II Cannone Silver is designed to respond swiftly under the bow, whilst offering nuanced control across dynamics and colour. It offers high bow resistance and a wide dynamic range with fast, articulate response while maintaining a flexible feel under the fingers. The distinct sonic character is defined by radiant clarity with luxurious overtones making Silver a perfect choice for performance in larger halls and those seeking a more vibrant presence.

This versatile five-string set includes two E-string options. *Silver E: powerful, bold and silvery. Perfect for assertive tonal presence. Caprice E: sparkling, focused and brilliant. Ideal for instruments that benefit from added brilliance.*

With responsive playability and a vibrant tonal palette, II Cannone Silver is a shining and powerful extension of the II Cannone family - engineered to enhance modern performance with elegance and precision.

Larsen II Cannone Silver for Violin
