

LARSEN STRINGS

Your sound. Your story.

Larsen Sovereign for Cello

Sovereign for Cello is our most soloistic string set - created to empower your sound and give you infinite freedom of expression. Developed in close collaboration with Larsen artists, Sovereign delivers a sound that is immediate, precise and rich in colour, allowing you to move effortlessly from dark, growling intensity to lyrical warmth and the lightest pianissimo.

Engineered around a clear, powerful core with tungsten-wound lower strings, and offered only in carefully calibrated true medium tension, Sovereign allows you to project musical ideas with precision and control.

- Exceptionally defined voices with strong projection
- Wide tonal spectrum from edgy darkness to lyrical warmth and lightness
- Effortless playability with fast and precise response
- Immediate reacting C string with depth, growl and focused power

Each string is newly formulated and individually engineered to fulfil a precise role within the set, giving you the freedom to push the boundaries of expression and sound.

Flexible steel wire cores in the lower strings unlock depth, harmonic richness and immediate response, while high-density tungsten windings on the G and C strings deliver darkness, power and projection without added stiffness. The result is a lower register that speaks with authority while remaining agile and clearly defined.

The stainless steel wound A string has a beautiful warm and focused voice, completing a balanced set with seamless response, stable intonation and a consistent feel from C to A.

Larsen Sovereign for Cello
