

LARSEN STRINGS

Your sound. Your story.

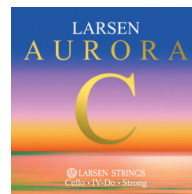

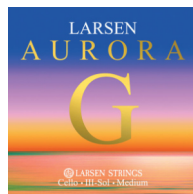

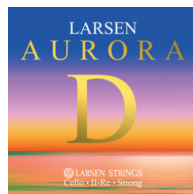

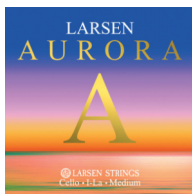

Larsen Aurora for Cello

The first step on your Larsen journey begins with Aurora Strings for cello, offering an affordable entry point into our range of strings without compromising the Larsen seal of quality and consistency. These strings deliver a smoothly brilliant sound without metallic overtones and represent great value, making them ideal for developing musicians.

In developing the Aurora Cello strings, we stayed true to our commitment to high quality and consistency, producing a product that offers extraordinary value at an affordable price. Available in Medium tension for a flexible, responsive feel, and Strong tension for enhanced projection and control, Aurora strings adapt to your playing style. With durable construction and precision engineering, these strings provide consistent performance and long-lasting reliability.

Designed to meet the needs of beginners and advancing players, Aurora for Cello help build confidence with their comfortable feel and predictable response. Whether playing solo or in an ensemble, these strings ensure that your instrument delivers optimal performance.

- A smooth & brilliant sound on A & D
- Warm & beautiful on C & G
- Easy playability
- Impressive string response
