

LARSEN STRINGS

Your sound. Your story.

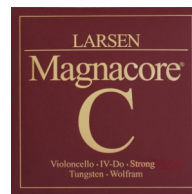

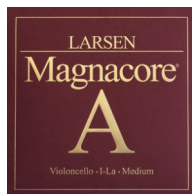

Larsen Magnacore® for Cello

Larsen Magnacore Cello strings are crafted for the discerning cellist, offering an exceptionally well-balanced sound that blends power and warmth. Known for their charismatic tone with edge and colour, these strings provide a high level of resistance to the bow, allowing advanced players to achieve a bold, sonorous sound with ease.

Available in both Medium and Strong tensions, Magnacore strings for cello let you tailor your setup to match your instrument's needs. The Medium tension strings are ideal for players seeking a responsive feel with a full-bodied tone, while the Strong tension version offers increased projection and resistance, making it perfect for powerful, darker instruments that benefit from added control.

Magnacore strings are designed with a solid steel core, precision-wound with high-quality flat wire, ensuring durability and a quick playing-in time. This makes them versatile for a range of cello types, offering reliable performance across a variety of musical settings. Whether you're performing solo or in an ensemble, Magnacore Cello strings provide a consistent, sonorous sound with the renowned Larsen quality.

- Charismatic sound with edge and colour
- Powerful, yet sonorous and warm
- High resistance to the bow
- Short breaking-in time
